

Project Design Phase-II Technology Stack (Architecture & Stack)

| | |
|---------------|--|
| Date | 03 October 2022 |
| Team ID | PNT2022TMID27807 |
| Project Name | Project – Skill and Job Recommender System |
| Maximum Marks | 4 Marks |

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

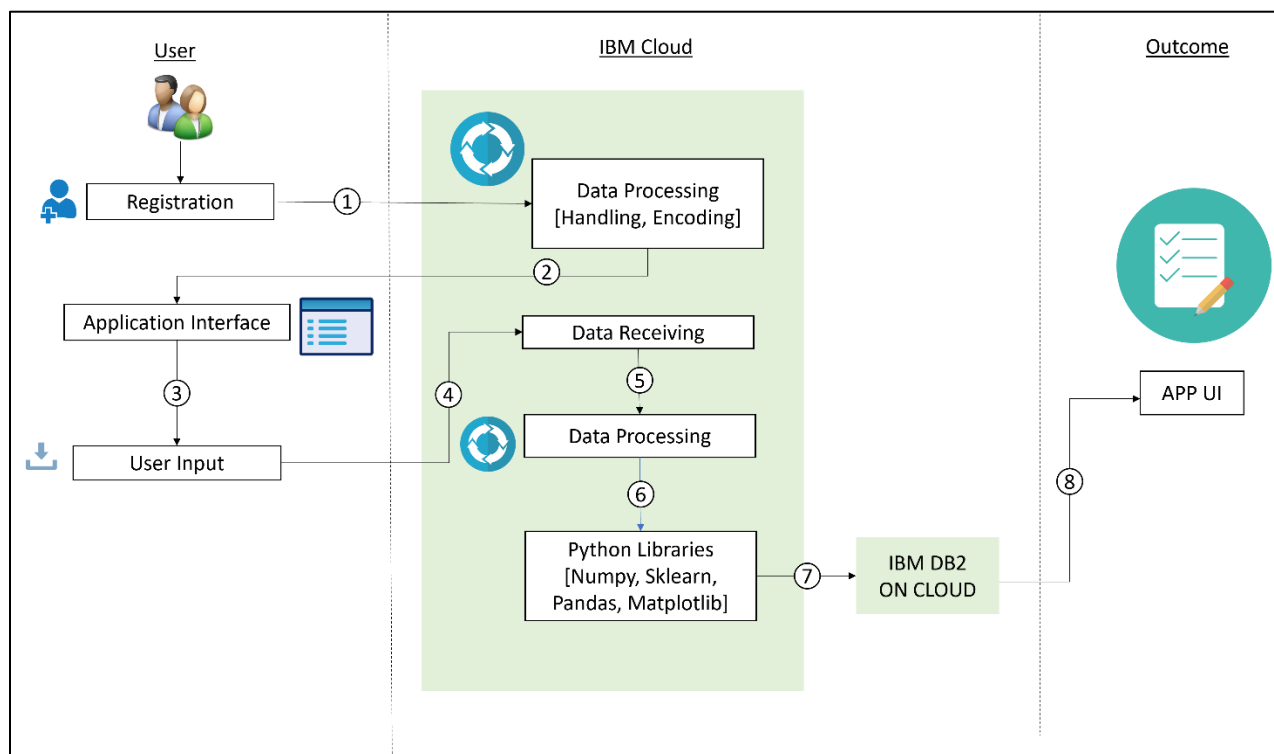

Table-1 : Components & Technologies:

| S.No | Component | Description | Technology |
|------|---------------------------------|--|-----------------------|
| 1. | User Interface | An Interface for the user to interact with the Recommendation model. | HTML, CSS, JavaScript |
| 2. | User Registration | User can register in the web application | HTML, CSS, Python |
| 3. | Job Seeker Preference | User gets collected the information regarding the type of job they are looking for and based on that they are recommended. | Python |
| 4. | Cloud Database | Database Service on IBM Cloud | IBM DB2, |
| 5. | Infrastructure (Server / Cloud) | Application Deployment on Cloud | IBM Cloud |

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|------------------------|--|------------------------------|
| 1. | Open-Source Frameworks | The python open-source frameworks are used to build the web application | Python Flask, NumPy etc. |
| 2. | Scalable Architecture | The 3-tier architecture used with a separate user interface, application tier and data tier make it easily scalable. | IBM Watson Studio |
| 3. | Availability | The web application is highly available as it is deployed in cloud. | IBM Cloud |
| 4. | Performance | The performance of the website is improved with caching and security. | IBM Cloud Internet Services. |
